Thinking years ahead, from day one.
That's us.

We're recruiting: Software Engineering (team member) in Berlin (Germany)

For our newly established corporate incubator team, we are searching for an enthusiastic engineer with a strong pioneer spirit. You can have fun shaping the future of digital and technical businesses within one of the key industrial players worldwide.

Why work with us?
Do you have the drive to build something new from scratch? Want to be part of the driving force to assist new incubations by engineering new products, creating regular MVPs and move projects forward? Do you like to work in agile teams and appreciate the fact of being able to creatively design your own work environment?

You always wanted to experience the atmosphere and advantages of working at a start up while enjoying the benefits of belonging to a premium automotive company?

Then become a part of our corporate incubator team!

The aim of our work is to build new game-changing business models to create sustained competitive advantage. Your engineering tasks are the innovations of the future!

Your Responsibilities

Your duties range from developing high quality components for the digital products or services to evaluating and rapidly prototyping innovative concepts.

- Develop high quality components across various fields (e.g. iOS, Android, Frontend, Backend, ...) for the digital products or services
- Implement new features in collaboration with product management and the design team
- Support in setting up engineering concepts and key tasks for upcoming development
- Collaborate for evaluation and rapid prototyping of innovative technologies and concepts
